S means you need to earn a 100% on the syllabus quiz.

Your current grade is calculated based on points earned divided by points possible within each category. Categories are then multiplied by their respective values and totaled to get your actual course grade. For example, following the first midterm, your lab average accounts for 50% of your current course grade, while your midterm is the other 50%. The current course grade is only an estimate, and assumes that you will continue to perform as you have in the course for the rest of the semester. If you do better or worse on future assignments, it may not accurately reflect your final course grade. If you are unhappy with your current course grade, please feel free to come talk with me.
